

NAWCC SpotAClock Reporting Form

This is the official form for reporting the location of public clocks. At this time spottings should be reported only by NAWCC members as we are in the pilot phase and wish to debug the system prior to going public. Note also that we are currently only asking you to report tower clocks and street clocks.

- A **Tower Clock** is one where the dial(s) are located near the top of a building, usually in a spire, cupola, or steeple, high above ground level.
- A **Street Clock** is one where the clock is on a freestanding pole or post. The post is usually set on a sidewalk or other ground level foundation.

To: National Association of Watch and Clock Collectors, Inc.

I've just spotted a _____ Tower Clock _____ Street Clock

Name of Building (if known) _____

Address: Street _____

City _____ County _____
