Approved by NAWCC Board of Directors, June 2019

Purpose and Mission

The National Watch & Clock Museum (NWCM, hereinafter "Museum") is a nonprofit educational institution located in Columbia, Pennsylvania dedicated to the collection, preservation, and interpretation of artifacts and material relating to the history, art, and science of horology. First opened in 1977, the Museum is operated by the National Association of Watch & Clock Collectors, Inc. (NAWCC). The NAWCC also operates the Fortunat Mueller-Maerki Library and Research Center, and the NAWCC School of Horology.

In furtherance of its mission The NWCM acquires, manages, preserves and uses objects. This document establishes the professional policies under which the Museum manages the objects and collections under its care.

Mission (Adopted by the Board of Directors, June 2009)

The National Watch and Clock Museum, in support of the overall mission of the NAWCC, interprets the history of time and timekeeping devices through educational programs, exhibits and special events. The goals of the Museum are to depict the importance of the measurement time within human society, reveal the artistry and science of timekeeping mechanisms, preserve and collect objects related to time and timekeeping, and explore their development from the earliest societies to the present day.

Scope, Use, and Management of Collections

The Museum collects items relating to its purposes as stated in its Purpose and Mission.

Scope of Collections

The Museum collections are international in scope, with a wide variety of clocks, watches, tools and other time-related objects. The largest representation is of 19th century American watches and clocks. The Museum seeks to maintain and continually develop culturally and historically significant collections. In particular, the Museum focuses its collecting activities on three dimensional objects dedicated to timekeeping, watch and clockmaking tools and equipment, and other objects of horological significance.

Use of the Collections

The Museum maintains a Documentary collection that consists of original, rare, and often irreplaceable historical and art objects to be preserved for future generations. Many of these objects have a known provenance that imparts intrinsic value to the object. Objects in the collection may be used for research and exhibition. The Museum avoids using objects in any way that is detrimental to their preservation.

Access to Collections and Collections Information

The Museum supports research using its collections and collections documentation, subject to any existing legal limitations and limits on the availability of staff and resources. In keeping with the Museum's established security and curatorial practices, and in the interest of protecting the Museum and its staff from liability for damage or injury, the Museum's collections storage areas are closed to the general public. The Museum Director and Museum Curator will establish written procedures for access to the collections storage areas, which will be monitored and documented by the Museum Curator. Museum staff will work with researchers who wish to access the Museum's collections and collections documentation and may also conduct inhouse research for the purposes of curating exhibitions, producing exhibition and collections catalogs, and documenting collections. In providing physical access to collections, priority will be given to the needs of the Museum's curatorial and exhibition departments.

During normal operating hours, the collections shall be accessible for legitimate research and study by responsible individuals, subject to procedures necessary to safeguard the objects and to restrictions imposed by limitations of space and facilities, exhibition requirements, and availability of appropriate curatorial staff. Collections personnel are responsible for handling requests for access to collections and collections documentation under their direct supervision. The Museum expects that all researchers, both inhouse and visiting, who make use of collections, will adhere to any legal or ethical restrictions on research imposed by the Museum, and that they will operate in accordance with the generally accepted ethical standards of the field in which they are working. The Museum may make collections data and images available for research and publication in print and electronic media, according to procedures developed by the staff and approved by the Museum Director and NAWCC Executive Director.

Management of the Collections

Objects in the collection are accessioned, cataloged, and tracked by Museum collections staff. They may be removed from the collection only through the deaccession process delineated in this policy.

Authority and Responsibility

The NAWCC Board of Directors is the governing authority of the Museum, and bears the fiduciary responsibility for the protection of assets of the Museum, including its collections. The Board is also required to ensure that the collections are carefully preserved and properly and effectively used for public educational purposes.

This Collections Management Policy, as adopted by the Board of Directors, establishes general policies governing the acquisition, ownership, care and use of collections. The Board has established the Museum Collections Committee to approve collections acquisition transactions as referred by staff in the name of the NAWCC and to recommend proposed deaccession transactions for full Board action. The Committee, together with the NAWCC Executive Director, bear the responsibility for developing and recommending policies for the Museum, including collections management, collections development, and other matters pertinent to the collections of the Museum.

Authority for the implementation of this Policy has been delegated by The Board of Directors to the NAWCC Executive Director. The NAWCC Executive Director shall delegate various authorities and responsibilities to the Museum Director and/or Curator, and the collections staff as deemed necessary.

The Museum Director maintains the Museum's Emergency Preparedness Plan and consults regularly with curatorial staff to keep the provisions relating to the collections up to date. The Museum Director shall present the plan to all internal and external participating parties to ensure responsibilities are understood and agreed. A copy of the plan shall be kept at the home of all participating parties. The Plan shall be formally reviewed and updated once per calendar year, or more frequently as circumstances require.

The Museum adheres to the Code of Ethics of the American Association of Museums (AAM), the Statement of Professional Standards and Ethics (American Association for State and Local History), and the American Institute for the Conservation of Historic and Artistic Works (AIC) Code of Ethics.

The Board of Directors adopted, in June 2009, the *National Association of Watch and Clock Collectors (NAWCC) National Watch & Clock Museum, Library & Research Center Ethics Policy Statement* that mandates high standards for Board and staff members in all areas of operation, including collections management.

Acquisition and Accessioning

Methods

Objects may be acquired by purchase, commission, bequest, gift, specified purpose or deposit, exchange, field collection, excavation, levy by creditors, abandonment, reversionary clause, and adverse possession. Objects may be acquired only in accordance as authorized by this policy and only when consistent with applicable law and professional ethics. All applicable federal, state, local and international laws, treaties, regulations, and conventions will be observed in the acquisition process and compliance documented as required. All rights, title, and interest shall be obtained by the Museum for all potential acquisitions, without restrictions or limiting conditions if possible, or shall have the potential of being converted to free and clear title under appropriate law.

Authority and Responsibility

No member or members of the Board of Directors, of any committee, or staff may obligate the Museum to the acceptance of any material or object not consistent with this policy. Further, the Museum will not purchase objects from staff or Board members.

The Museum Director will report all accessions to the collections for formal ratification by the Museum Collections Committee.

Criteria

Objects considered for the Museum collections must meet all of the following tests of acquisition before being acquired by the Museum by any means:

- The object or objects must conform to the Museum's mission, as well as enhance and strengthen the existing collection.
- The present owner must have clear title, and come to the Museum with such.
- If an acquisition is a purchase transaction, the staff must arrange funding before purchase. Funds for purchase of Museum objects must be secured from and within annual budgets approved by the Board of Directors, proceeds from deaccession sales, or from other sources. Funding amount must consider transportation, insurance, storage, restoration, curatorial expenses, and other anticipated expenses associated with the object. Total funding must be itemized and provided to the Controller before purchase.
- If an acquisition is a purchase transaction, a fair market value, which is in line with current market values, must be determined between the parties.
- The Museum must be in a position to care properly for the proposed acquisition.
- Documentation should be adequate to establish provenance and justify the significance of the material or objects.
- All known moral, legal, and ethical implications of the acquisition must have been addressed.
- Acquisitions should be free of restrictions on ownership, intellectual property rights, copyrights, patents or trademarks.
- Acquisition must be free from donor imposed restrictions.
- Gifts are to be accompanied by Deed of Gift form

Appraisals

No Museum staff or Museum Collections Committee member shall offer appraisals or the monetary value of objects to donors, or reveal the Museum's insurance value, for the purpose of establishing a fair market value of gifts offered to the Museum.

Donors desiring to take an income tax deduction must obtain an independent appraisal. Staff or Board members may assist a donor in locating a qualified appraiser from a list of appraisers maintained by the Museum. Staff or Board members will not appraise or otherwise place a monetary value on objects casually brought to the Museum.

Acquisition of Culturally Sensitive Objects

The Museum subscribes to the provisions of the UNESCO Convention of 1970. The Museum shall refuse to acquire objects where there is cause to believe that the circumstances of their collection involve the destruction of historic sites, buildings, structures, habitats, districts, and objects. It is the policy of the Museum to collect, care for, and interpret materials in an ethical manner that respects the diversity of cultures and religions. The Museum recognizes that it also holds a fiduciary responsibility for the care and interpretation of its collections and complies with the Native American Graves Protection and Repatriation Act.

Deaccessioning and Disposal

Purpose

In order to maintain the collection in accordance with the Museum's mission and charter purposes it may be necessary or desirable to dispose of certain objects. The deaccession process shall be cautious, deliberate, and scrupulous. The deaccession and disposition process will be thoroughly and uniformly documented and undertaken in accordance with current professional standards and ethics. Records of the object and the process will be retained by the Museum.

Authority and Responsibility

The Board has established the Museum Collections Committee to recommend proposed deaccession Transactions. These recommendations are presented to the Board of Directors for action.

Criteria

Museum objects to be considered for deaccession must have been in the collection for a minimum of three years, and must meet at least one of the following criteria:

- Mission: Object does not fall within the scope of the purpose and mission of the Museum.
- Scope: Object does not fall within the current scope of the Museum's collections criteria and policy.
- Condition: Object has deteriorated to the point its value has been lost, is no longer suitable for exhibition, is damaged beyond repair or restoration, or its condition endangers other artifacts in the collection.
- Is a hazard to the safety of staff members and/or Museum visitors.
- Authenticity: The object has been discovered to be a fake or forgery, or identity has been firmly refuted.
- Cost of Care: Objects the Museum cannot afford to properly preserve, protect or store.
- Use: Objects that the Museum will never use, including duplicates, copies, fakes, second-rate objects and other unneeded or substandard material.
- Program strength: The artifact can be exchanged with another institution or individual in return for an object or objects of greater significance to the collection.
- The artifact is subject to repatriation under the provisions of the Native American Graves Protection and Repatriation Act.

Missing or Stolen Objects

Objects missing from the collections cannot be deaccessioned. If an item cannot be physically located, it cannot be disposed of. Documentation records for the missing item will be annotated to indicate the object cannot be located.

Restricted Items

As indicated under Acquisition and Accessioning, acquisitions must be free of donor imposed restrictions. In the event an item proposed for deaccession is found to have such restrictions, the Museum shall consult with legal counsel before proceeding with the deaccession of a restricted gift.

Deaccession Proposals and Decisions

Authority and Responsibility

The Museum Curator may propose the deaccession of objects that meet one or more of the deaccession

criteria listed above by submitting a deaccession proposal for each item to the Museum Collection Team. The proposal shall contain the following information: date of proposal; accession number of object; name and brief description of object; name and address of source; date of acquisition; reason for deaccession; limiting conditions agreed to at the time of acquisition; reasons for accepting limiting conditions; book, insurance, and estimated market values; proposed method of disposal and agent.

The Museum Collection Team reviews the proposed deaccession items and forwards final deaccession candidates to the Museum Director, who will reply in writing, approving or disapproving and designating the means of disposal.

The Museum Director will submit each proposed deaccession to the NAWCC Executive Director for approval. Objects that pose a hazard to the safety of visitors, staff or the collections may be approved for deaccession after receiving verbal approval from the Museum Collection Committee. All deaccession proposals will be reported in writing to the Museum Collection Committee for approval; items approved will be formally ratified at the next meeting of the Board of Directors.

Disposal

Deaccessioned objects shall not be given, sold, or otherwise transferred, publicly or privately, to employees, officers or Board members of the National Association of Watch & Clock Collectors, or to their immediate families or representatives.

Disposal of deaccessioned objects is solely for the advancement of the Museum's mission.

Proceeds from the sale of deaccessioned collections objects shall be deposited to the Museum Acquisitions Fund. Monies in the Fund are to be used only for acquisition and conservation of the Museum Collections. Museum staff, working with the Executive Director, shall recommend specific uses of monies from the Fund, subject to final approval by the Museum Collections Committee.

The NAWCC Executive Director will choose an appropriate method of disposal for each deaccessioned object. Deaccessioned objects may be sold at public auction, by open or sealed bid; sold through private negotiation to another institution; exchanged with another 501(c)3 institution for objects that meet the Museum's acquisition criteria and have been approved for acquisition by the proper authority; given or sold to another museum; transferred to the Education Department or NAWCC School of Horology.

Destruction

An item may be destroyed if its condition warrants. If a deaccessioned object is to be destroyed, the destruction should be done using a safe and appropriate method, with the destruction documented and witnessed by an impartial observer.

Deaccession Records

The Museum Curator will maintain a deaccession log as well as a permanent file on each deaccessioned object. The deaccession files should include copies of all acquisition and cataloging records on each deaccessioned object, as well as a copy of the deaccession proposal, and records of the approval of the deaccession by the Museum Collections Committee and the Board of Directors, the disposal of the object and any funds received from the disposal of the object. Additionally, donors of items sold where the sale proceeds are significant, will be credited as the donors of newly acquired specimens purchased with sale proceeds.

Loans

The Museum borrows objects from and loans objects only to other non-profit museums or galleries. Objects on loan not intended for specific exhibition purposes must be presented by the Museum Director to the Museum Collection Committee for approval. The Museum Director must demonstrate that the acceptance of the proposed loan furthers the Museum's purpose and mission as stated above and will not affect the Museum's efforts to collect similar objects for the Museum's documentary collection.

An annual report to the Museum Collection Committee will be made on all loan activity which has occurred since the previous report. The loan activity report shall include an inventory of all objects, borrowed and loaned.

Incoming

The Museum may borrow objects for exhibitions, education programs, or study that fulfill its mission. All incoming loans must be thoroughly documented by use of an Incoming Loan Agreement Form and printed copies of all relevant communications regarding the request of the loan, its arrival, use and return to the lender. Objects may be requested pending the following:

- The ability of the Museum to afford borrowed objects with appropriate care and security without endangering or neglecting items in its own collection;
- The suitability of the object for the requested purpose;
- The cost of borrowing, storing, using, packing, returning and insuring the loan is reasonable for the use intended by the Museum.

The Museum will examine the relationship of potential lenders to determine if there are potential conflicts of interest or the appearance of conflict, and will take steps to avoid real or perceived conflict of interest regarding borrowed objects.

The Museum will not accept any commission or fee from the sale of objects borrowed for exhibition, unless such exhibition was explicitly organized for the sale of those objects.

The Museum will retain full decision making authority over the content and presentation of exhibitions, but may consult with lenders on the significance of borrowed objects in the exhibition.

The Museum shall afford borrowed objects with the same care and security as that given its own collection. Care for borrowed objects is the responsibility of the Curatorial department.

Objects on loan not intended for specific exhibition purposes must be presented by the Museum Director to the Museum Collections Committee for approval. The Museum Director must demonstrate that the acceptance of the proposed loan furthers the Museum's purpose and mission as stated above, and will not affect the Museum's efforts to collect similar objects for the Museum's documentary collections.

All loan agreements shall be for a specified period of time, not to exceed eighteen months, without review by the Museum Collections Committee.

Outgoing

Objects from the Museum collections may be loaned only to qualified museums, educational or other institutions, to qualified conservators, or to individuals or corporations engaged by the Museum to produce replicas or adaptations of collections objects. The Museum may make its collections available on loan for legitimate educational purposes. Loan requests must be made in writing.

All outgoing loans must be thoroughly documented by use of an Outgoing Loan Agreement Form and printed copies of all relevant communications regarding the request of the loan, its arrival, use and return to the Museum. Loans will be approved only if arrangements have been made for the safe custody, exhibition, and handling of the object or objects. An object or objects shall be considered for loan only if all of the following conditions are met:

- The object is not currently on exhibition and will not be needed for exhibition or educational purposes during the proposed loan period. Objects of particular rarity will only be loaned under special circumstances and with the approval of the Museum Collection Team.
- The object is in stable condition and will not be damaged by shipment, exhibition, or any other educational use proposed by the borrower.
- The object is not used for purposes other than static exhibition or study unless approval for other uses is recommended by the responsible curator and approved by the Museum Director and NAWCC Executive Director.
- The borrowing institution provides proof of insurance coverage and its ability to safeguard the object while in transit and during exhibition or other approved use, in accordance with acceptable professional museum standards. Loan requests should be accompanied by a completed *Standard Facilities Report*.
- The object has been properly recorded and documented by the Museum's staff and bears an identification number.
- A condition report is prepared prior to the loan and a copy accompanies the object to the borrower.
- The borrowing institution agrees to promptly report any changes in stability, condition, or use to the Museum's staff for assessment and treatment.
- All loans shall be for a specified period of time, not to exceed one year without review and renewal.

Fees

The Museum may charge borrowers a fee for each collection object loaned if needed to defray costs in time processing, packing, and shipping objects, on a fee schedule to be approved by the NAWCC Executive Director and the Board of Directors.

Objects in Custody

Objects may be placed in the temporary custody of the Museum, for the purposes of research, identification, consideration for acquisition into the collections, or evaluation for loan. Placement of an object in the temporary custody of the Museum does not constitute a transfer of legal title to the Museum. All temporary deposits are subject to the conditions set forth on the reverse of the *Temporary Custody Receipt*, which must be signed by the owner or owner's representative before the object is delivered to the Museum. Objects on temporary deposit will be stored properly and monitored; however, the Museum will not insure objects placed in its temporary custody, nor will it rehouse, catalog, or make them available to researchers.

Objects in Custody are limited to a period not to exceed 90 days and, as such, shall not be considered to be part of the Museum's emergency preparedness plan..

The Museum Curator must assign a Temporary Deposit Number to each object in temporary custody. The Museum Curator will maintain a log of Object in Custody and indicates in the log when objects on deposit are either returned to their owners or added to the Museum's collections. The Museum Curator monitors the location of objects in the temporary custody of the Museum.

Documentation of Objects in Custody of the Museum must be retained permanently, without regard eventual disposition, in the event there are subsequent claims of ownership or responsibility for damages.

Objects in Custody must be periodically reviewed to ensure they are being handled expeditiously.

Preservation of Collections

All objects in the Museum's collections are subject to the current standards of professional care. To ensure consistency, the Museum Curator will issue general guidelines for the care of the collections. It is the responsibility of all Museum staff to inform interns, volunteers, researchers, consultants, and vendors with whom they work about these policies, procedures, and guidelines, and ensure that they are followed.

Conservation action may only be taken by trained, professional conservators or other qualified individuals with guidance from the Museum Curator if required. Any treatment must respect the integrity of the object. Conservation treatment of the fabric of an object must include earlier repairs and modifications which, after examination and research, are found to be historically significant. Any new material added to the object must be minimal and must be compatible with the future welfare of the object. No action may be taken without a thorough technical examination of the object and a written proposal of treatment listing all possible treatment options. Each treatment proposal must be approved by the Museum Curator. Once treatment is undertaken, the conservator must provide a written report of all conservation actions that will be maintained in the object's Accession File and made available to researchers and scholars upon request. Objects on loan to or from the Museum will not be repaired, cleaned, or otherwise treated without written permission from the owner of the objects.

Risk Management and Security

Authority and Responsibility

The NAWCC Executive Director has the authority to contract for insurance and to authorize the degree

of coverage for the Museum's collections objects as well as objects on loan to the Museum.

The Museum Curator will maintain records of the book value of each object if known when accessioned, the current replacement value, and the insurance value of each object.

The collections and security staffs are responsible for monitoring the Museum's exhibition and storage areas on a routine basis

The curatorial and security departments ensure that the Museum's Emergency Disaster Plan provides for the safety of the Museum collections.

Criteria

The Museum meets its mission of preservation through a program of risk management, which includes reducing risks to the collection, providing onsite security and retaining insurance policies against loss or damage to the collections. The Museum retains fine arts insurance to provide for replacement or restoration of significant collections in the event of damage or loss. Insurance values will be based on the fair market value of the object as determined by the Museum's curatorial staff. If Museum staff cannot provide an accurate insurance value or if the period of an outgoing loan is greater than one year, a professional outside appraisal may be required. For outgoing loans, the borrower may be charged for an outside appraisal. These records will indicate the date of each change in value and the staff member responsible for the change.

Security

Physical security must be balanced with access, as the Museum is both obligated to make its collections available to the public, and to safeguard the objects for future generations.

Criteria

- Doors should be secured with locks, preferably with auto-locks, and equipped with either key locks or electronic card readers. Doors should never be propped open or left unlocked.
- Intrusion alarms should be installed in collection storage areas, and tested on a regular basis..
- Collections care staff should be the only persons with regular access to collections storage areas. Access should be limited to those who have a need to be there; and an access list of authorized individuals should be maintained.
- Visitors to collection storage and use areas must be accompanied by a staff member, and be required to sign in and out. Visitor logs shall be retained in accordance with records retention policy.
- Food and beverage items are prohibited from the collections storage areas.
- Briefcases, backpacks, or other items large enough to hide or create risk of damage to objects shall not be allowed in collections storage areas.
- Tours should be scheduled in advance and limited to the number of visitors that the staff is able to supervise. Staff should be trained in emergency procedures, including health emergency of a visitor, and where the emergency exits from the area are located.
- Museum staff must report damage to or loss of any object, as soon as discovered, to the Museum Director and the Security Department, who will notify the Museum Curator and relevant staff. The Museum Director will provide appropriate information to police, other appropriate agencies, and the Board.

- The Registrar will maintain all records relating to the investigation of missing or stolen objects.
- The Museum shall conduct systematic inventories of its collections on a five year cycle with annual spot checks.

Documentation: Collections Records

Documentation is the proof of what a collection object is, where it came from, what has happened to it, and who owns it. Documentation is an integral aspect of the use, management, and preservation of collections, and one of the primary means by which a museum exerts intellectual and physical control over its collections.

Authority and Responsibility

The Museum's staff creates and maintains documentation for all collections. The Museum Curator is responsible for creating and maintaining records of accessions, deaccessions, and loans, as well as catalog records for all accessioned objects.

The Museum Curator will ensure that duplicate copies of all records are maintained in a secure, offsite storage area.

Criteria

Documentation of objects must be clear and comprehensive, and include photographs of case, dial and movement, at a minimum

Electronic records shall be regularly backed up and transferred, as necessary, from one generation of hardware and/or software to another. General information technology risk management principles suggest software versioning no older than current minus one. Periodic backups must also be stored in a secure, offsite location.

Accessions will be recorded in accession number order in a permanent Accession Register. The primary purpose of collections records is control and documentation of the collections. Therefore, these records should provide at least the following information:

- Object Name.
- Title, if applicable.
- Identifying description of object.
- Assigned number.
- Other identifying marks.
- Legal status of object.
- Condition of object.
- Location of object.

Access to Records

Records access is subject to applicable public law, including the 1996 Federal Freedom of Information Act. Collections staff are responsible for controlling and documenting access to collections records under

their direct supervision. The following items of information are considered privileged:

- Addresses of donors and lenders.
- Location of objects.
- Valuation of objects.
- Identity of donors and lenders, if anonymity is requested.
- Information that is restricted intellectual property.

Monitoring and Compliance

The Museum Director monitors compliance with this policy and reports lack of compliance to the NAWCC Executive Director. Upon adoption, all staff and Board members will receive a copy of this policy. All new staff and Board members will receive a copy of this policy as part of their orientation to the Museum.

Policy Review

The Museum Curator initiates review of the Museum Collections Management Policy by the Board of Directors and staff of the Museum, at least once every five years.

Definitions

Accession: an object or group of objects obtained at one time from a single source.

Accessioning: the formal process used to accept and record an artifact as a collection object.

Acquisition: the discovery, preliminary evaluation, negotiation for, taking custody of, taking title to, and acknowledging receipt of materials and objects; or negotiating for and recording information about borrowed objects.

Book value: the initial monetary value assigned to a collections object at the time of acquisition.

Collection: consists of representative samples, original, rare, or often irreplaceable artifacts of horological significance to be preserved for future generations.

Collections object: an item that has been or is in the process of being accessioned into the collections.

Deaccessioning: the process used to remove permanently an object from the Museum's collection or to document the reasons for involuntary removal.

Disposal: The act of physically removing an object from the Museum collection. See also: deaccessioning.

Insurance Value: the current monetary value assigned to a collections object for insurance purposes.

Inventory: a) an itemized listing of collections objects that identifies the current physical location of each object; b) the process of physically locating all or a subset of objects for which the Museum is responsible.

Loans: temporary assignments of collections objects from the Museum or temporary assignments of similar objects to the Museum for stated Museum purposes, such as exhibition and research. These assignments do not involve a change in ownership.

Objects placed in the custody of the Museum: items that are not owned by the museum but are left temporarily in the Museum for other than loan purposes, such as for attribution, identification, or examination for possible gift or purchase.

Provenance: a history of ownership for an object that can be documented through written records and/or oral tradition.

Registration: The process of developing and maintaining an immediate, brief, and permanent means of identifying an object for which the institution has permanently or temporarily assumed responsibility.

Replacement value: the cost of acquiring an object similar or identical to a given collections object.
