<u>CA00001</u>	Street Clock		2302 Ventura Blvd, Camarillo, Ventura County, CA 93010
<u>CA00002</u>	Tower Clock	An unusual and novel device is this "Solar Post Clock" which is located in front of Jacobs & Sons Jewelers at 7th & "B" Streets in downtown San Diego. This is supposedly the first solar powered clock to be installed in San Diego. It was a gift to Chris Jacobs from the Seiko company in 1983, and Chris had it installed. The solar collector can be seen at the top of the clock. The head is approx 24" in dia. & is mounted on a post which is approximately 20' tall. It has a very accurate time-only quartz movement and runs on a solar powered battery system that theoretically can run for 90 days without sunshine (there's very little likelihood that such a sunless period would ever occur in San Diego!). The jewelry store has been moved to another location, but as of now there are no plans to move the clock.	SW corner of 7th & B St, San Diego San Diego County CA 92112

[CA00003](#) Street Clock

An unusual and novel device is this "Solar Post Clock" which is located at the San Diego Zoo. The solar collector can be seen at the top of the clock. The head is approx 24" in dia. & is mounted on a post which is approximately 20' tall. It has a very accurate time-only quartz movement and runs on a solar powered battery system that theoretically can run for 90 days without sunshine (there's very little likelihood that such a sunless period would ever occur in San Diego!).

San Diego Zoo in Balboa Park, San Diego,
San Diego County

[CA00004](#) Street Clock

A post clock in front of the "Parkhouse Eatery", 4574 Park Blvd. in the Univ. Heights area of San Diego (CA). Information about this clock was obtained from its present owner who lives in Mexico, and the ownership was traced back to a well-known San Diego realtor--Art Leitch. The present owner purchased it about 1977 for his antique store, which preceded the restaurant, from a jeweler who in turn obtained it from realtor Art Leitch, who had it built. I talked to Art, who is 87 years old, but his memory is fading and he doesn't remember much about the clock. Art's family and the manager of his Real Estate office could not offer any help. In research, at the San Diego Historical Society archives, I found that the location of Art Leitch's offices during the '50s was adjacent to the jeweler from whom the clock was purchased and was the location from which the clock was moved by the present owner. That pretty well dates the clock. This nearly 15 ft tall Time-only clock has the letters "GloDial" on 1 of the 2 dials which are approx 24" dia., with Arabic numerals; it's electric; The builder is unknown

4574 Park Blvd, San Diego, San Diego
County, CA 92116

CA00005	Street Clock	<p>A larger relatively new Street clock is located at Adams Avenue & Ohio Street in the "Normal Heights" (or Adams Avenue antique row) area of San Diego (CA). This nearly 16-ft tall Timeonly clock was made by the Verdin co. of Cincinnati Ohio. It was installed in 1990 and is owned by the Adams Ave Business association. The 4 dials have arabic numerals; it's electricly powered; and has a photo cell to automatically control back lighting. The post of the clock weighs 245 lbs and the clock head weighs 532 lbs.</p>	Adams Ave & Ohio Sts, San Diego, San Diego County, CA 92116
CA00006	Street Clock	<p>A Street clock (w/2-dials) is located in the Copley Plaza of the Old Globe Theater complex, in San Diego's (CA) Balboa Park. The Plaza is named for it's donor Helen Copley, publisher of the San Diego Union-Tribune. The 12-ft Time-only clock was made by the Verdin co. of Cincinnati Ohio and installed in 1993.</p>	Balboa Park, San Diego, San Diego County, CA
CA00007	Street Clock	<p>A Street clock (w/2-dials) is located on Fern street at the intersection of Grape street in the "Golden Hills" section of San Diego (CA). The 10-ft Time-only clock was made by the Verdin co. of Cincinnati Ohio, and installed in 1990. It is owned by the City of San Diego and maintained through the South Park Maintenance & Beautification Fund.</p>	SW Corner of Grape & Fern St, San Diego, SD County, CA 92102
CA00008	Street Clock	<p>A street clock (about 14' tall, w/2-30" dials) is owned by and located in front of the hotel Del Coronado on Orange Avenue in the city of Coronado (CA). It was made by "Canterbury Designs" of Sherman Oaks CA, and installed in 1986. It is a time-only, twodial, illuminated clock with the identification "Hotel Del Coronado".</p>	1500 Orange Ave, Coronado, SD County, CA 92118

[CA00009](#) Street Clock

A 3-dial Street clock is located in front of the "Towne Centre Professional Building" in Chula vista (CA) at 345 F street. The specifications of the clock: built by Electric Time Co. Inc. of Natick Mass.; installed in 1980 when the building was erected; owned by the Towne Center Professional Building Owners' Association; height 12 feet; the three dial-heads are each 3-ft square; has a copper roof; remotely controlled/reset from an indoor location; internally illuminated with flourescent lights controlled by a time-switch, and externally lighted by a flood-light on the ground in front of each of it's 3 faces

345 F Street, Chula Vista, SD County, CA 92010

[CA00010](#) Street Clock

A nice 4-dial Street clock is located in the "Park Plaza shopping Center" Chula vista (CA), at the corner of 3rd & F streets. It was built in 1984 by "Canterbury Designs" of Sherman Oaks CA, for the "Redevelopment Agency" of the City of Chula vista. It is 16 1/2 ft tall with four 30-in dia dials. It contains a Maas-Rowe Carillon which has the capability of chiming on the hour with a preamble and optionally: chiming on the half-hour; playing any of many melodies on the hour. It also has the option of playing: On weekdays only; Sundays only; or Every day of the week; and between the hours of 5:00 am and 10:00 pm.

SW Corner of 3rd & F St, Chula Vista, SD County, CA 92010

[CA00011](#) Street Clock

A clock in Bern Switzerland was the inspiration for this wonderful clock, constructed in 1907. It is 22' tall and although it has a time-only movement it is complicated in that it has over 300 moving parts and 20 dials: 16 of which are in the head--a large dial on each of its 4 faces, as well as 12 auxiliary dials which tell time of principal cities of the world, as shown in the photo. The movement has 4 additional dials (in the base of the clock) indicating hours, minutes, seconds, month, date and day of the week. The movement has a gravity escapement and contains 17-jewels made with native San Diego (CA) stones of Tourmaline, Topaz, Jade and Agate from the Jessop mine on Mount Palomar (CA) and cut in their own shop. Every part of the intricate mechanism was designed and made by hand in the Jessop shop. It is claimed to be the most completely jeweled and the finest street clock in America, and the first clock of its kind ever built in a retail jewelry store. The pendulum bob weighs 55 lbs. The motive power is a weight which is wound automatically by an electric motor every 8 hours. [The weight was originally 200-lb but later changed to 100 lb.] The head weighs 1,000 lb. The clock took 15 months to build, was exhibited at the State Fair in Sacramento (CA) in 1907, and awarded a gold medal. The clock's weight system extends into a vault which is 12' below the street level. The clock has been relocated within San Diego (CA) several times. At the time the clock was built, J. Jessop and Sons Jewelers was located at 952 5th ave. In 1927 the store was relocated to 1041 5th and the clock was relocated also. The most recent move was to Horton Plaza shopping center, downtown, in 1984. The clock is still owned by the Jessop family of San Diego. The clock has been overhauled only twice: first in 1948; the second, prior to its move to Horton Plaza in 1985, averaging about 40 years

4th and Broadway, San Diego, SD County,
CA 92112

[CA00012](#) Tower Clock

A unique Tower Clock is located in the Metropolitan Transportation Center at 12th & Imperial streets in downtown San Diego (CA). The center has a storage yard for their rolling stock which includes: San Diego transit system busses; San Diego trolley cars; as well as the "Coaster" (a commuter train that runs between Oceanside and San Diego). A free-standing 233 ft tower which contains the clock mechanism (a master & 4 slave timepieces and a digital programmable chime/strike system). The Swiss Bank corporation which worked with the County of San Diego and the Metropolitan Transit Development Board, arranged for the donation of the clock from "Ebel Watchmaker co." of Switzerland [it was not made by Ebel.] It was presented as a gift to the people of the City of San Diego and has been valued in excess of \$700,000. The tower was built in 1988 and the clock installed later that year. The clock has four-dials, with red Roman numerals, a white face and 6-foot long red hands. The mechanism was shipped unassembled to San Diego from Switzerland in a jumbo jet. It took 12 days for Swiss technicians to put the system together. Several boxes and crates containing the slave movements had to be handcarried up the 15 stories of the tower (there is NO elevator or stairways, only ship's ladders). Then the parts for each movement were assembled and placed through a small hole in the center of the dial at the top of the tower. The holes weren't wide enough to use a crane. There was a scaffold system outside to assist in installing the clocks. The 4 movements are controlled by a master clock system located on the second level of the tower and is battery-operated in the event of a power failure. The clock system has electronic speakers; is capable of Westminster chimes, hr & 1/2 hr strike, The Angelus, Mass, individual ball-peals, and music via a compact-disc; also has powerful back lighting so it can be

12th & Imperial , San Diego, SD County, CA
92112

CA00013	Tower Clock	<p>The clock, with 5 foot tall movement, was manufactured by the Seth-Thomas Company of Thomaston Connecticut in 1890; purchased by the county for \$420; and installed in the San Diego County courthouse in 1890. A local jeweler M. German, maintained and regulated this clock for \$100 yearly. The two-ton bell attached to this clock was silenced in 1919 because it disturbed court trials and nearby hotel residents. In addition, it's ringing resembled the town fire bell and caused many false alarms. In 1939 the bell and movement were removed because it feared they might fall into the courtrooms below. The bell placed on loan to mission San Luis Rey (in Oceanside, CA), and movement crated and placed in storage until 1979 when it restored by Chapter 59. Since the pendulum & weight for the movement were missing, replacements were fabricated by members of Chapter 59. Only the time train is operational, and was modified to allow automatic rewinding of the weight with an electric motor. The restored movement was rededicated to Public Service on May 14, 1981 housed in a customized glass-enclosed case (for protection while permitting the operating movement to be viewed from 3 sides) with 3 (smaller then the 5 foot dia original) dials above the movement in a simulated tower structure. This display is located in the lobby of the present courthouse, 222 W. Broadway, San Diego.</p>	222 West Broadway, San Diego, San Diego County, CA 92112

		The local Catholic Church has a working Seth Thomas clock, with four dials. It was installed in 1888, Number 487, made by A. S. Hotchkiss, Thomaston, CT. It has at least one bell of 1500 lbs, and weights of 300 lbs. This clock was restored in 1995 and put into service by a Bob Harpenau, from Troy, a man interested in the historical aspects of Troy, but had no previous clock experience. The clock is still working today. Troy is a small community on the Ohio River, about half-way between Louisville, KY and Evansville, IN. It is the second oldest town in Indiana.

KS00002	Tower Clock	Pendulum replaced by electric motor	N. Court & E. Third St, Colby, Thomas County, KS

KS00003	Tower Clock	The Wichita-Sedgwick County Historical Museum started in 1939 and moved into the late-1800's City Hall in 1981. Soon thereafter lightning struck the clock/bell tower setting it afire. Fortunately, the remainder of the museum was spared. The fire warped several gears in the 1917 Seth Thomas model #16 8-day strike tower clock movement. The movement was restored by Lloyd Larish and moved to a level well below the dials and bell. Now a driveshaft of approximately 60 feet runs from the movement to the dial gearbox which drives the four dials. The movement has been electrified with the chimes and bell strike coming from a separate carillon although there is still a bell in the tower— I believe the museum's tower clock bell was cast by the McShane Bell Foundry of Baltimore which has been in continuous business since 1856. Chapter 63-member Steve Draher who maintains the clock was on-hand to describe the movement and maintenance procedures to fellow members.

MD00001	Tower Clock	The Bell is marked: Baltimore Bell Foundry J. Register & Sons Baltimore, MD 1887 The Bell is about 3' in diameter and seemed to be less loud than expected. The clock was in another building until 1968. It is very greasy. It is mechanically wound by an electric motor connected to drums on the winding arbors by a removable leather belt. There is a tensioning lever that allows the transfer of the belt from 1 arbor to the other using the same motor to wind both side of the clock. I was surprised to see an arch domed clock of this size with a date of 1887. The internet Howard Clock list identifies the Riesterstown clock as "D/28 #1 S Town Hall". That is incorrect. Eline's information is that his great, great grandfather paid for the clock which was installed in a livery and gathering hall. Jeff and Eline care for the clock. Durward Center said J. Register was Joshua Register. Register was another firm making bells in Baltimore. There was some cooperation between the firms on certain projects, but they were independent of each other. Bill did not know the exact span of time during which Register opened.	85 Main Street Reisterstown , MD 21152

NY00012	Street Clock	TEXT FROM ARTICLE IN OSWEGO THE POST STANDARD- June 24, 2004 Franklin Mills and Nathan Albert Petrie donated the Chime Clocl to the village of Parish. the clocks's 1923 value was estimated at \$1,900, equivalent to nearly \$20,000 today. The clock stands outside the Parish Public Library. Mills and Petrie donated the library to Parish, too, in 1922. That cost about \$20,000 to build. The Chime Clock is a remarkable four-dial structure, mounted on a bronze base and capped by a bronze ornamental ball. It is electrically lighted and equipped with chimes, which peel every quarter hour, as well as strike each hour. A master wind-up Chime Clock located inside the library governs the Chime Clock outside. The master wind-up Chime Clock displayed in the public library needs to be wound every seven days in order for the four face Chime Clock outside the library to function. [NY00021](#) Street Clock

Text from Article in the Oneida Dispatch The old street clock in front on Hinman's Jewelry store was a landmark in downtown Oneida for nearly 30 years until a car accident ended its reign as father time on Main Street. But the clock, that hasn't been used since the accident, has found a new home. The 1,600 pound structure is being restored to be used at the Remsen train depot, about 15 miles north of Utica in Oneida County. The Remsen man first noticed the clock in 1977, when he visited Oneida on business and has been interested in it ever since. "I always admired that clock", said Bruce Phelps after he purchased it from Jack Wallace. Phelps said when he noticed the clock down he was in the process of building a new train depot in Remsen for the Adirondack Scenic Railroad. "I was one of the forefathers in 1998 for the new depot. I got a vision to build the depot and we did." I had a vision of bringing the clock to Remsen and donating it to the depot." The clock is now in Remsen and with help from Oneida Foundries is expected to be keeping time again by fall. "I want to have it up and running before the end of September," Phelps said. Autumn is the railroad's busiest season because of the scenery that comes with the changing of the leaves. Phelps said the parts needed to restore the 91-year old clock are mostly obsolete and with the help of the workers at Oneida Foundries he will be able to restore it. The clock was brought to Oneida by Wallace, owner of Hinman's Jewelry store, in 1977. Before then, it stood for more than 60 years in Monessan, PA. The clock was originally owed by H.P. Brown, whose son, Benjamin, invented and manufactured it. The clock inspired a business of street clocks known as Brown's Street Clocks. the company sold five models of street clocks, with its biggest standing at more than 14 feet high and weighing more than 1,600 pounds. T.Z. Thomas, the man who North side of Main St (also called Montauk Highway) 100 ft west of Railroad Ave.

[TX00001](#) Tower Clock

The Walls Unit of the Texas Prison system is located in the city of Huntsville. To my knowledge, it is the only state prison in the US that has a functioning tower clock. For some 30 years, I traveled the 8 southwestern states of the US for USDA. After learning of this clock, I visited this prison. I took my camera and my NAWCC membership card and walked into the prison office. I was able to convince the Warden that I should be permitted to take pictures of the clock. A Major of the prison guards was assigned to escort me. We went up into the "attic" of the main building where I examined the Seth Thomas tower clock movement and took pictures. We then went through the security doors into the prison "yard". I went up the stairs to the landing where Carrasco and his two cohorts made the attempted escape and took a picture of the clock dial that faces the "Yard." According to the Texas Prison Museum, the clock was originally installed in the late 1890's in a tower of the then existing prison building. It had four dials. That building was renovated in 1942 and the clock was reinstalled in the remodeled building but with only 2 dials. Unless you have been a prison employee or an inmate of the Walls Unit, you would not get to see the dial of the clock facing the "yard". Fred Gomez Carrasco, a convicted drug lord from the San Antonio Texas area was imprisoned at the Walls Unit Texas State Prison in Huntsville, Texas. He and two other inmates took over the prison library. On Friday, August 2, 1974, one of the hostages was released to inform officials of his escape plans. The inmates constructed a movable shield of chalk boards, peg board, and library books to get them safely from the second floor library to the waiting armored car. The next day, Texas Ranger Captains Pete Rogers and G. W. Burks led the attempt to intercept Carrasco's "Trojan horse." When the escape vehicle stalled while turning a corner on the

VA00001	Tower Clock		46950 Community Plaza, Sterling, Loudin County, VA
VT00001	Tower Clock	This Clock is located in the tower of town hall (municipal Building) on the Village square of Bellows Falls, VT. The clock can be seen from any of four directions as you approach Bellow's Falls. The clock was installed in 1927 as a gift from N.L. Vilas, a man of means form a neighboring NH community. It replaced a clock that had been lost in a major fire in 1925 that had destroyed the earlier town hall. However, it is said that the bell for this clock (steel) was salvaged from the earlier town hall fire, and is of pleasant sound. Within the past 10 years the efforts of a local civic group (Our Town) the clock was restored to good operation, and again tells the time from its four sides, striking the hours. (A strike silence feature was added in the recent overhaul which eliminates an audible dound between 8:00pm and 6:00 am.)	Village Square, Bellows Falls, Windham County, VT

		Seth Thomas 8-day tower clock. Model 15. Church built in 1926. Movement was originally weight driven. Movement was electrified by I.T. Verdin Company (Cincinnati, OH). Pendulum, escapement, and winding arbors were removed. Still utilizes original gear trains, rack, snail, and strike mechanism. Linkage to 4 dials (above) has been redone. Strikes on one bell. Eugene Hartmann, Caretaker 304-3658-2935	Franklin, WV
WV00001	Tower Clock		
		Court House built in 1898--no funds for a clock, but built tower and dials. Clock installed and started Feb 1, 1922 at 4:40 p.m. Clock, bell, and illumination for dials purchased from E. Howard. Reported June 8, 1921. Original purchase price of \$2,421.00. Purchase financed by fines from prohibition offenses. Time weight has drop of 22 feet, strike weight drops 44 feet. Has original note with instructions or care from E. Howard . Still would manually. Numbe r547 cast onto time barrel gear. Round-top plates. Snail is slotted. Serial number 3570 Dave Kyle, Caretaker	Parsons, Tucker County, WV
WV00002	Tower Clock		

WV00003	Tower Clock	Small tower at entrance of bank. Locals recall a post clock which has been removed from the front of a former funeral home.	Terra Alta Bank, Terra Alta, WV
WV00004	Tower Clock	Originally a Pollhans movement? No remnants of original movement. Court House built in 1911. Bell reads: American Bell Foundry Co. No. 42 Northville, MI Magistrate made reference to original movement having a mercury pendulum. Can not be verified.	Grafton, WV Elizabeth, Wirt County, WV
WV00005	Tower Clock	Time train was electrified, then drive shafts removed and dials electrified. National Time & Signal Corp., Oak Park, Mi. Stevens movement remains, minus pendulum, snail, escapement and verge. Three original cranks (one broken) and three original drive shafts remain. Pendulum bob hung below floor. Bell missing, but yoke is signed "Meneelys' West Troy, N.Y. Rotary Yoke Pat. Oct 9th, 1860." Weight box filled with scrap iron and stones remains tied to strike barrel.	Weston, WV
WV00006	Tower Clock	Tower clock movement is complete and functional, but dials are now driven by electrical system. Original transmission and drive shafts still on site. Round-top plates. Gathering pallet for rack is a replacement. Internal dial is program dial for turning on dial illumination. Bell signed: Meneely & Co. West Troy, NY 1899 Board of Regents E. Howard Watch & Clock Co. Normal School Boston & NY West Virginia 1899 Names of board members	Glennville, WV
WV00007	Tower Clock	Seth Thomas tower clock model 16. Serial #2364. Dated March 1, 1924. Includes placard noting women's club purchase. Six-foot dials. Movement has small unsigned dial and also a bit second dial at escape wheel arbor. Bit second hand is missing. Strie winding arbor is bent. Still wound by hand. Includes time for illumination of dials. Bell is apparently from one of the older (original?) court houses. Bell reads, "Cast By/A. Fulton/Pittsburgh/1848". Movement runing, but very dirth. Gears had been oiled. Custodian: Nelson Goff	Harrisville, Ritchie County, WV

WV00009	Tower Clock	Six-foot dials. Wound by hand. Movement runs, but does not keep good time. Movement is currently being cleaned & degreased. Round-top plates. Bell reads: "John Fallagher/Pittsburgh"	Middlebourne, Tyler County, WV
WV00010	Tower Clock	Verdin Frame and electronics. Originally a Pollhans movement? Dial motion works and some gears may be original. Strike tran disabled. Court House constructed in 1901.	New Martinsville, Wetzel County, WV
WV00011	Tower Clock	Seth Thomas model 17. Original frame and works, but both trains have been electrified. Original dial motion works and drive shafts. Clock is one level above the dials, and power is transferred below the floor through drive shaft. Escapement and pallets are only items missing. Original Pendulum, strike fly, winding crank, and crutch are on site. Very large bell reads "H. McShane Bell Foundry/Balto. MD. /1899/ The Seth Thomas Clock Co./New York/" Bit second dial on movement. Some evidence that this unit may have driven a second clock in the courthouse. Second clock is directly above court room entrance. Tower clock movement was electrified or repaired in 1980.	Fairmont, Marion County WV
WV00012	Tower Clock	Excellent E. Howard two-tran with Dennison Gravity Escapement. Appears to be all original. Movement sits idle, as dials are now running electronically. Seven foot dials Article in file	Morgantown, Monongalia County WV
WV00013	Street Clock	2 dial post clock. Jeweler's name on dial.	360 N. Main Street, Morgantown, WV
WV00014	Tower Clock	Originally a Howard movement? Movement completely removed. Electrics to dials and to controls below not functional at this time. Bell signed E. Howard. Dials are 8 feel in diameter	West Union, Doddridge County, WV
WV00015	Tower Clock	Howard round-top movement. New fan and new parts on crutch. Some repairs and restoration (fan, internal dial) by Virgil S. Linger in 1996.	Mannington, WV
WV00016	Tower Clock	Originally a ST #15. Currently in storage. both trains had previously been electrified. Serial no. 1643. September 10, 1910. No pendulum or escapement.	Buckhannon, Upshur County, WV

WV00017	Tower Clock	McClintock 2-dial clock. Building is across from Court House. Perhaps originally a bank. Case is tall enough that it presumably has chime tubes inside.	Romney, WV
WV00018	Street Clock	2-dial post clock. 12 feet tall. Corner of Winchester Ave. and 55 (Main St.) No apparent markings on case.	Moorefield, WV
WV00019	Tower Clock	Second or third movment. Original around 1921. Electric in 1953? Bell signed: Buckeye Bell Foundry Columbia St. Cincinnati East of Broadway 1857	Ripley, Jackson County, WV
WV00020	Tower Clock	Original ST movement is gone. Simplex computer-controller runs four dials of tower clock. Two old master clocks are on site. (basement closet) Both are master clocks by ITR, one dating from the 1920s, and the other probably from the late 1930s.	Morgantown, WV
WV00021	Tower Clock	E. Howard Small model. Serial number 2657. "8" cast onto bell yoke. No markings on bell. Dials are now electrified. (one motor each dial) Orginal movement is missing pendulum, escapement, bushings, shafts, and time winding barrel. Wooden weight box falls to chute by Judge's Chamber. Wooden Weight box is marked: From/ The E. Howard/ Clock Boston/ Tower Cable Electrified by Rodgers Clock Repair, Harrisburg, PA On the square	Washington & Fairfax Sts, Berkeley Springs, Morgan County, W
WV00022	Tower Clock	Originally had three dials. 4th dial and other work by Arthur Prather around 1976. Now wound twice a week as drop space was lost during renovation. No markings on bell itself, but frame says rebuilt 1992 by G. Jay Hurley."	Shepherd College, Shepherdstown, WV
